

The background of the slide features a grayscale image of palm trees being blown over by a strong wind, likely from a hurricane or tropical storm. The trees are leaning significantly to the right, and the overall atmosphere is hazy and intense.

DisasterMed

Healthcare data when you need it most

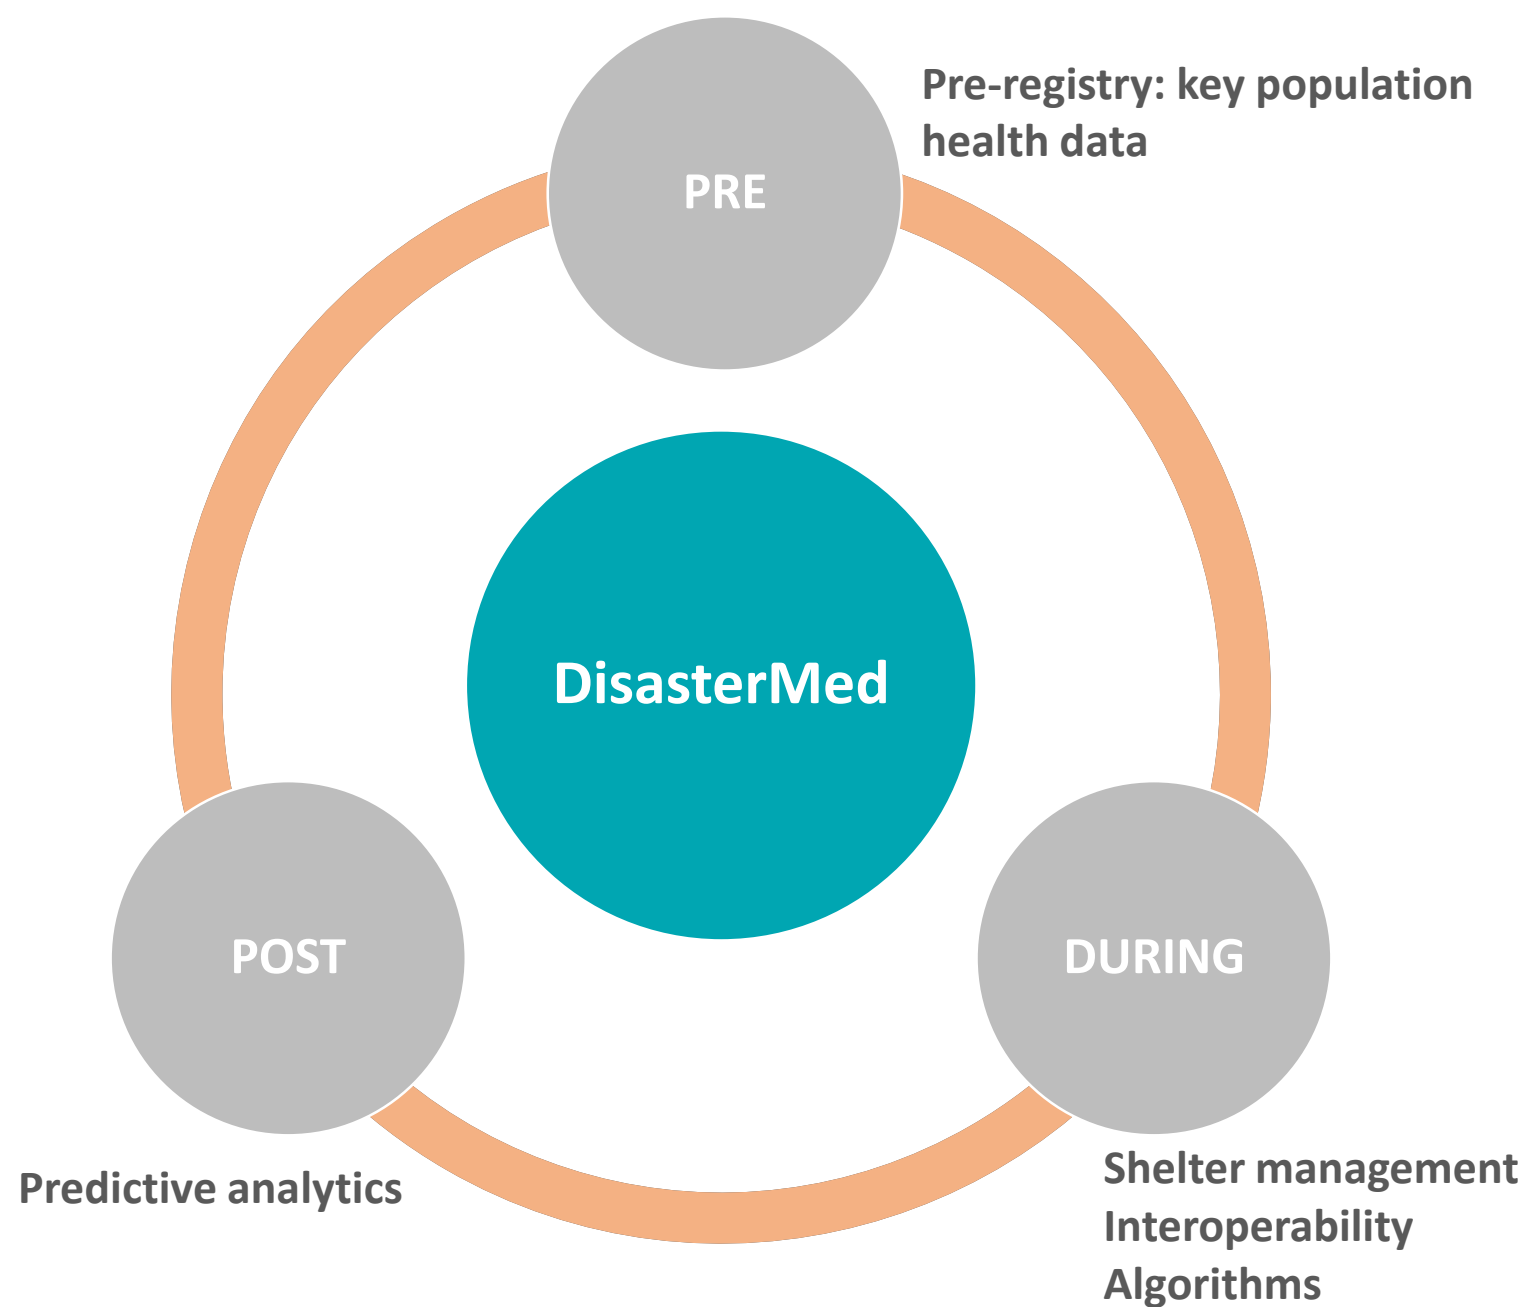

Lack of **accessible, real-time** healthcare information in disaster situations

Over 31 M
people displaced
globally every year

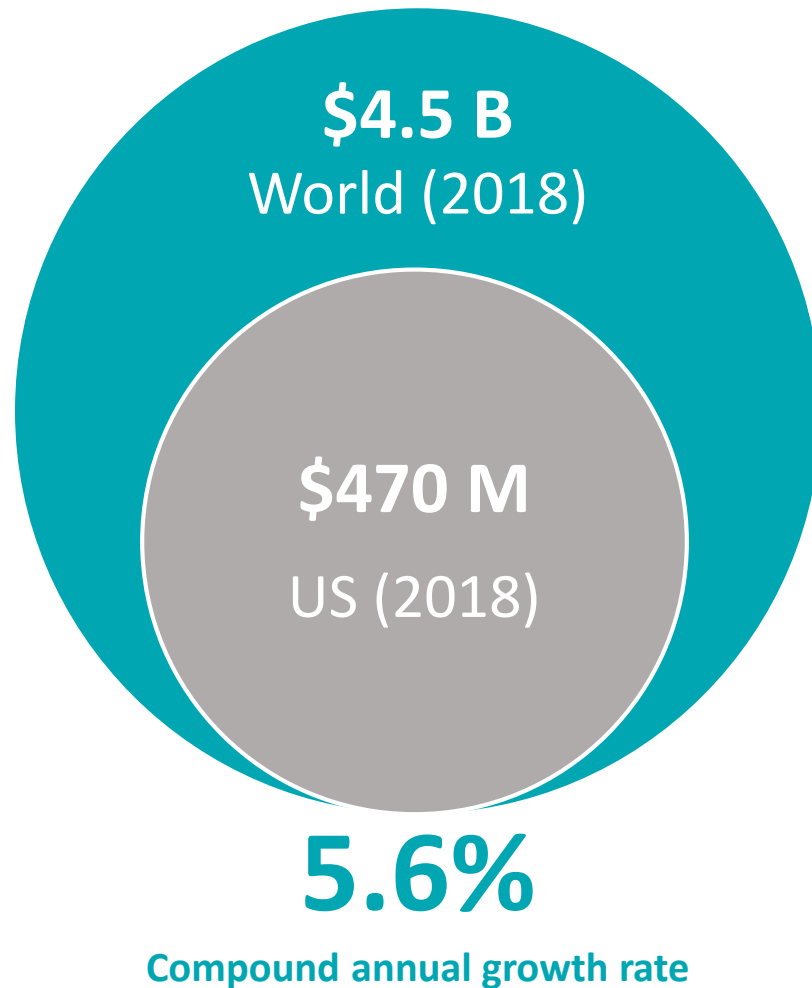

3 of 4
victims have an
immediate medical
need

Market
